STANDARD KEYPADS

HMI Systems' standard keypad offerings allow a designer to build semi-custom systems for a minimal cost. Our standard keypads are made from high quality silicone that can be laser etched with specified button legends, text or company logo. Standard keypads also include:

- LED indicator(s) for each button
- Custom etchable icons
- Backlit for night viewing
- Waterproof Seal

MULTI INDICATOR

Bringing a more contemporary look to the dash, Digital Switching Systems' multi indicator keypads offer a wide variety of styles and applications to meet your needs. With up to 14 button configurations, most button positions can have up to three indicator lights for advanced functionality.

POWERKEY PRO

Reconfigurable, readdressable and relegendable, the PowerKey Pro is the ultimate interface device. This flexible, smart and rugged family of keypads offers endless applications and configurations to meet the needs of any industry.

SEMI-CUSTOM

HMI Systems offers a number of semi-custom/configurable products that use a standard base HMI product and configures it within the limitations of the product to a specific set of requirements. The configuration may be performed at various points within the assembly/supply chain. Once assembled, it is considered a "custom" product.

CAPABILITIES

- Allows unique artwork per application
