* This easy-to-use tool allows you to configure a part, get CAD models, and 2D drawings.

The HR-Series is a perimeter illuminated, IP68 sealed rocker switch, featuring a stylish, low profile actuator that is available in either two or three positions. These rocker switches have a variety of dependent and independent illumination options; momentary and maintained circuits; and up to two customizable laser-etched legends.

The patented design supports the various illumination options and allows the switch to be rated up to 20 amps, eliminating the need for relays. Additionally, these low profile rocker switches fit the industry standard cutout.

Product Highlights:

- Dynamic Perimeter Illumination
- IP68 Above Panel Sealing Protection
- 20A 12VDC
- Maintained and Momentary Circuits
- Various Illumination Options
- Single and Double Pole

Typical Applications:

- Marine
- On/Off-Highway
- Lawn Equipment
- Golf Carts
- Any Application Requiring Sealing Protection
