

RW INTEGRATED SOLUTIONS

Contract Manufacturing Facility

WHO WE ARE

RWIS Provides the technical expertise needed to meet a customer's unique requirements and demands. We pride ourselves on our commitment to quality, low to medium minimum-order quantities and quick turnaround. RWIS offers sophisticated vendor-managed inventory (VMI) programs to light manufacturing jobs and engineering support, as well as an effective logistical solution.

Turn to RWIS when just-in-time (JIT) just isn't good enough anymore. We routinely work with both ends of the supply chain to help OEMs maintain optimal inventory levels of critical electrical components you need. Not only do the capabilities of RWIS streamline and simplify the ordering process for customers, but it also frees up both financial and human resources to help improve your bottom line.

LIGHT MANUFACTURING

- Pad Printing
- Laser Etching
- Mechanical and Electro-mechanical Assembly
- Complete Box Build
- Full Assembly Services
